EDUCATION

The University of Sydney, Sydney, Australia

Jul 2023 – Jan 2025

Master of Data Science, specialising in Machine Learning

GPA: 3.2/4.0

Soochow University, Taipei, Taiwan

Sep 2018 – Jun 2022

Bachelor of Computer Science & Information Management

GPA: 3.1/4.0

PROFESSIONAL EXPERIENCE

Conditional Consultant (Independent Contractor)

WorldQuant BRAIN, Remote

Mar 2025 – Present

1. Achieved Gold Level in the WorldQuant Challenge within five days and was appointed as a Conditional Consultant on the BRAIN platform.
2. Designed and implemented a scalable alpha research framework integrating genetic algorithms, template-based expression generation, validation logic and API-driven simulation workflows.
3. Submitted over 1,700 optimised alpha strategies with strong performance across diverse data domains, including model, analyst, fundamental, risk, and alternative datasets, spanning the USA, EUR, ASI, IND and GLB regions.
4. Awarded GRAND MASTER Level Certificate for achieving top-tier alpha performance, recognizing consistent excellence in signal quality and portfolio diversity.
5. Achieved the top ranking in Taiwan and ranked 14th globally in May 2026 based on the out-of-sample performance of all Alpha submissions during the three-month period ending 31 March 2026.

Data Scientist Intern

FYTO (US-based), Sydney branch

Aug 2024 – Dec 2024

1. Helped shape a 7-day wildfire prediction project from 0 to 1 by narrowing an initially broad problem scope into a feasible study area near SilverStar Mountain Resort in British Columbia, Canada.
2. Conducted literature review and Python-based exploratory analysis of wildfire distribution, proposing a 60 km radius target region that laid the foundation for the project's subsequent data collection and modelling.
3. Collected and integrated multi-source datasets, including weather, geological, population, and wildfire history data, from government platforms and the Google Earth Engine API.
4. Improved model input quality through feature engineering, outlier handling, and data quality checks, including correlation analysis and multicollinearity assessment, helping increase wildfire occurrence detection recall from 75% to 90%.
5. Built and evaluated LightGBM, LSTM and XGBoost models using a sliding-window framework, and contributed to deploying a Docker-based web platform for real-time wildfire risk visualisation.

SKILLS

Programming: Python, Java, JavaScript, R

Data Tools: SQL, MySQL, PostgreSQL, Tableau, Power BI, LaTeX, Microsoft Office

Quantitative: Quantitative Analysis, Mathematical Modeling, Market Data Analysis

Languages: English, Mandarin (Traditional and Simplified), Korean (Yonsei University Program)

AWARDS

GRAND MASTER Level – WorldQuant BRAIN Quarter 3 2026 Genius (Authorised by Nitish Maini, CSO)

July 2026

Systematic Predictions Challenge – Global Rank: 28

July 2026

MASTER Level – WorldQuant BRAIN Quarter 2 2026 Genius (Authorised by Nitish Maini, CSO)

April 2026

AI Alphas Competition 2.0 (LLM) – Global Rank: 454

March 2026

MASTER Level – WorldQuant BRAIN Quarter 1 2026 Genius (Authorised by Nitish Maini, CSO)

January 2026

MASTER Level – WorldQuant BRAIN Quarter 4 2025 Genius (Authorised by Nitish Maini, CSO)

October 2025

EXPERT Level – WorldQuant BRAIN Quarter 3 2025 Genius (Authorised by Nitish Maini, CSO)

July 2025

Gold Medal – Multimedia Production and Studio Practice (Soochow University)

July 2021

Collegiate Programming Examination (Soochow University)

January 2020
